UNIVERSE JOURNEY

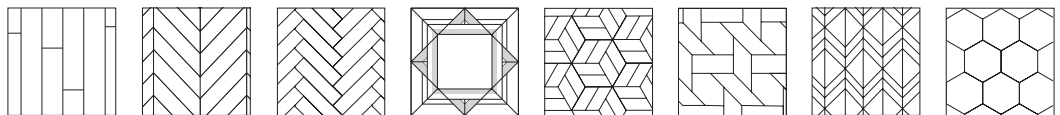

Universe Journey Collections

Life is a cycle in which we are connected to each other by invisible bonds in this infinite universe we live in.

The wood that has been living for millions of years is getting old, moldy, carving and changing. All the elements in nature, weather conditions and changing the color drying leaves, mossy stream stones, graying metals...

It's as mysterious as you look at all the colors behind mist. It all tells the endless cycle of life and reminds you of the power of existence. Forever, You can look some beauty without being tired and bored
